HET PATEL

MERN Stack Developer

ABOUT ME

- A Full Stack developer with 4 years of experience in the industry, with high-level proficiency in MERN stack technology.
- Knowledge of various Reactjs frontend libraries like Nextjs, AntDesign, Redux/Redux Toolkit, Material Design, etc.
- Proficiency in working with various backend technologies like Nodejs, Expressjs, Nestjs, etc., and experience in working with different databases like MongoDB, MySQL, Postgres SQL, etc.

EDUCATION

Bachelor of Engineering(B.E) in Computer Engineering
Gujarat Technological University(GTU)

EXPERIENCE

Silver Webbuzz PVT. LTD.
Senior Full Stack Developer
Experience - 4 years

- My primary responsibilities include designing client-side and server-side architecture, building the front end of applications through engaging visual design, and developing & managing well-functioning databases and applications.
- I have worked on several MERN(MongoDB, ExpressJS, ReactJS/Redux, NodeJS) stack projects.
- Recently I'm working as a Senior backend developer in a nodeJS project and a Lead front-end developer on a nextJS-based project.

SKILLS

Operating Systems	Windows, macOS
Frontend Technologies	HTML, CSS, Javascript, ReactJS, NextJS, Redux, Redux-Toolkit AntDesign, MaterialUI, React Storybook
Backend Technologies	NodeJS, ExpressJS, NestJS, AdonisJS
Databases	MySql, SQLite, MongoDB, PostGRE
ORM	TypeOrm, Sequelize, Prisma
DevOps	Git, Github, Docker

PROJECTS

AuditUI

- Description - We created a platform for bank with modern UI, where it can be able see the Audit details and transaction details for each Audit ID.
- Technologies used - React, React Storybook, Redux Toolkit, Node, Express, DynamoDB, Serverless.
- Created reusable, responsive and modern components using React Storybook.
- We used AWS Lambda for achieving Serverless architecture.
- Used AWS database dynamoDB for creating the database.
- Team size - 5

Digits(Node/Angular)

- Description - We provide a platform where Number Plate dealers/private(seller) and the Malaysian Government can find the middle ground to transact easily. This portal is for government agencies JPJ and PUSHPAKOM, the agency can sell unique number plates online and can get paid online by using the BILLPLZ payment gateway.
- In this portal buyer can buy a direct plate or can place a bid for a plate number, the seller can accept the highest bid and the plate will be sold out. Admin can show the monthly sales of number plates with different charts like pie chart or bar chart.
- Technologies used - Angular, NodeJS, NestJS, MongoDB, Github, and Docker
- Site URL - Link(Under beta testing)
- Team size - 3

Plumb App(React/SQLite)

- Description - Platform to see all your social media accounts in one place ie, E-Diary for your social media platforms.
- Users can add any social media account like Instagram, Facebook, Twitter, Blogger, etc., and can store them in one place.
- Using different third-party libraries like react-masonic for generating infinite masonry format scrolling.
- Technologies used - ReactJS, FontAwesome, Framer Motion, NextJS, NodeJS, SQLite.
- Team size - 2

Chat2carz(React/Node)

- Description - The purpose of this South African website is to allow users to sell and/or purchase cars online, Roadside Assistance, Car Listings, Car & Fleet Tracking, etc.
- Worked on creating user-friendly and responsive design.
- Created reusable components.
- Technologies used - ReactJS, NodeJS and MongoDB, AWS
- Site URL- Link
- Team size - 3

PicsLike(ReactJS)

- Description - PicsLike is a web based platform whereby picture enthusiasts can upload their images which are being liked or disliked by the community. Based on the core algorithm corresponding rating and value has been added to the picture which provide points to the users. Users can purchase things from third party vendors based on the received points
- Worked on creating user-friendly and responsive design.
- Created reusable components.
- Technologies used - ReactJS, jQuery, AWS
- Team size - 3
